

X-TAN®

Wet white – The next generation

» A sustainable tanning technology

TFL – Great chemicals. Excellent advice.

Innovation drives sustainability

X-Tan pretanned leather benefits:

- Looks, feels and performs like chrome leather, but contains no metals (no chrome and no aluminum)
- Brilliant colours: from unbeatable white to deepest jet black
- Environment-friendly tanning process: reduced effluent load without reactive tannins
- Circular: Long lasting, ages beautifully, reformable back into useable tanning agents
- End of life: is biodegradable and compostable (ISO 20136 & 20200) without persistent, harmful chemicals remaining
- Is durable and meets all relevant physical and fastness requirements such as tear resistance, light and crock-fastness
- Sustainable articles with non-detectable bisphenols and up to 85% bio based carbon content
