

# Statement of Compliance regarding VOC

## **Statement of Compliance regarding VOC**

On behalf of TFL Ledertechnik GmbH we confirm that TFL products supplied and sold from Europe pose no toxicological or ecological risks (other than described in the material safety data sheet), according to the present state of our knowledge.

Volatile Organic Compounds (VOC) are defined in differing ways depending on their use pattern. In reference to EU Regulation 1907/2006 (REACH) and the former EU Commission Directive 2001/58/EC, VOC presenting a health or environmental hazard within the Directive 67/548/ECC have been disclosed in section 2 or 3 of the Material Safety Data Sheet. This includes ozone depleting chemicals subject to EG regulation 2037/2000 to fulfil the requirements of the Montreal protocol (1987) and its amendments.

TFL products are listed in the European Chemical Substance Inventories (EINECS), sold in the European Union and exported world-wide to the leather industry. Product labelling and marketing are in full compliance with the current legal requirements of the European Union for leather chemicals including the relevant registration, health and safety regulations.

Our recommendations are in line with our present state of knowledge. They do not, however, exempt the customer from performing his own tests to determine the suitability of the supplied products for their intended purposes. Application of the products lies outside the scope of our control and therefore comes within the customer's sphere of responsibility.
