July 2011

TFL – a frontrunner in GHS implementation

At the mid of May 2011, TFL France S.A.S. went live with GHS labelling. GHS (also called CLP) is the **G**lobal **H**armonized **S**ystem on how to classify and label chemical products.

TFL decided to be fully compliant with the GHS regulation from the start and not to wait until the transition period ends in 2015. TFL France S.A.S. has now made the first successful step in the GHS project. After the summer holidays TFL Italy and later this year TFL Brazil and TFL Argentina will follow.

The first milestone has been reached now and TFL is one of the first companies which classifies, labels and prints fully according to the new GHS regulation.
