

Product Information

Finishing

RODA® Base AF-B – Base coat compound

Edition 2019

Product properties

RODA® Base AF-B is a ready to use compound based on synthetic binders and touch modifiers forming a very soft and elastic film with a good penetration.

RODA® Base AF-B gives to the leather a very good sealing of the grain and a natural and silky touch. RODA® Base AF-B is recommended to be used for soft nappa and floater articles to maintain a very natural look.

The main benefits obtained thanks to RODA® Base AF-B are the following:

- Good covering power, without overloading the grain
- Natural and silky touch
- Good adhesion properties
- Very natural bending behaviour

Application

RODA® Base AF-B can be applied by spray guns after the addition of some pigments from our RODA® Lite 07 range in a ratio which can vary from 5% to 15%, depending on the final article to be achieved.

It is recommended to stir RODA® Base AF-B well, before use.

Chemical nature

Aqueous blend of polymers and auxiliaries

Appearance

Opaque white liquid

solids

9,0 – 10,5 %

pH

9,0 – 10,5

Charge

Anionic

Storage

The product can be stored in its original packaging between 5°C and 35°C for 12 months.
