RODA® Base Reco 3 – Water based compound

Product properties	<p>RODA® Base Reco 3 is a ready to use product which is extremely soft and has great covering power, particularly designed as the main component for covering pre-bottoming and snuff grain leather coverage where great covering and grain reconstruction need to be achieved, even when a small quantity of product is applied.</p> <p>RODA® Base Reco 3 shows excellent adhesion which is particularly appreciated when used on previously oiled leather on pull-up articles as a covering and adhesive base.</p> <p>In this case it is advisable to use further adhesion promoters, such as RODA® Pur ADX.</p> <p>Due to its nature, RODA® Base Reco 3 remains very superficial on application: this helps colour uniformity and brightness, even on pure or semi-aniline leather. RODA® Base Reco 3 gives the leather a pleasant tacky touch and a very soft, waxy feel. These characteristics are enhanced on particularly soft leather, especially garment and upholstery, or on nappas for milled shoe / leather goods.</p>
Application	<p>RODA® Base Reco 3 is applied by roller coater or spray guns in a quantity of 4-8 gr/sqf diluted in a minimum ratio of 1:1.</p> <p>RODA® Base Reco 3 is compatible and mixable with the majority of the products of our range. The product can be pigmented with a 5 -10% maximum pigment ratio.</p> <p>It is advisable to cross-link it with 0,5-1% of RODA® Link 5504; it can be subsequently fixed with products of our RODA® Fix range.</p>
Chemical nature	Formulation based on acrylic resins
Appearance	Opaque slightly yellow paste
Solids	24.0 – 26.0 %
pH	8.0 – 9.5
Charge	Anionic
Storage	The product can be stored in its original packaging between 5°C and 35°C for 12 months.
Safety	For safety information see the safety data sheet

Regarding toxicological and ecological data see the safety data sheet of above product.
