RODA® Bind TLC 327 – Protein binder

Edition 2007

Product properties	<p>RODA® Bind TLC 327 is a protein binder suitable for shoe uppers, garments and leather goods which forms a very soft, smooth touch film.</p> <p>RODA® Bind TLC 327 finds its application in full grain finishing either in polishable pre-bottomings or in covering base coats for plated or glazed articles, conferring a very good grain sealing to the leather without altering its natural appearance. In top seasons it should only be used as a partial component due to its scarce fixability with formaldehyde.</p>
Application	<p>RODA® Bind TLC 327 is applied by spray guns mixed with the binders and auxiliaries required by the article that is to be achieved.</p>
Chemical nature	<p>Formulated by water based casein and plasticizer</p>
Appearance	<p>Light amber opaque liquid</p>
Charge	<p>Anionic</p>
solids	<p>7.5 – 8.5 %</p>
pH	<p>8.0 – 9.0</p>
Storage	<p>The product can be stored in its original packaging between 5°C and 35°C for 12 months.</p>
Safety	<p>For safety information see the safety data sheet</p>

Regarding toxicological and ecological data see the safety data sheet of above product.
