## Finishing

RODA® Care NC – Water based pre-bottom

Edition 2010

<b>PRODUCT PROERTIES</b>	<p>RODA® Care NC is a water based pre-bottom ideal for either full grain and slightly corrected grain upholstery articles.</p> <p>Thanks to its softness, RODA® Care NC allows obtaining finished leather with a very natural look.</p> <p>The use of this pre-bottom allows levelling small defects and making the absorption more even.</p> <p>RODA® Care NC has good adhesion on crust and allows at the same time a good adhesion of the subsequent finishing layers.</p> <p>In order to avoid residual stickiness, we suggest isolating with a nitro emulsion from our RODA® lac range before printing and milling operations.</p>
<b>Application</b>	<p>RODA® Care NC must be applied by roller coater in a ratio of 35-40 gr/sqm. In order to further improve the adhesion we suggest adding 4% of RODA® Pur 76. We also advice adding 3,0-5,0% pigments from our RODA® Lite range. The natural look will be enhanced after 1 night milling.</p>
<b>Chemical nature</b>	Synthetic and natural modified binders in water emulsion
<b>Appearance</b>	White opaque paste
<b>solids satisfied</b>	23.5 – 25.5 %
<b>pH</b>	7.5 – 9.5
<b>Charge</b>	Anionic
<b>Storage</b>	The product can be stored in its original packaging between 5°C and 35°C for 12 months.
<b>Safety</b>	For safety information see the safety data sheet

Regarding toxicological and ecological data see the safety data sheet of above product.
