RODA® Cryl 5037 – Emulsion of acrylic copolymer

Product properties	RODA® Cryl 5037 is an acrylic resin used for the impregnation of buffed leather, any time firmness of the grain has to be improved. Leather treated with RODA® Cryl 5037 remains smooth and uniform even after vacuum operations. Its good penetration properties make it indicated for leather with low absorption.
Application	RODA® Cryl 5037 is mainly applied by roller coater. We suggest applying the product after mixing it with water and with the appropriate penetrator agent. The quantity of penetrating agent required depends on the water absorption of the crust.
Chemical nature	Emulsion of acrylic copolymer
Appearance	Opalescent white liquid
Solids	39.0 – 41.0 %
pH	2.0 – 4.0
Charge	Anionic
Storage	The product can be stored in its original packaging between 5°C and 35°C for 12 months.
Safety	For safety information see the safety data sheet

Regarding toxicological and ecological data see the safety data sheet of above product.
