Finishing

Edition 2006

RODA® Oil AA 4040 - Oil

Product properties

RODA® Oil AA 4040 is an extremely versatile product which can be utilized:

- In the cationic pre-bottoming of anchorage combined with resins and cationic polyurethanes;
- In the polishable pre-bottoming to diminish the excessive absorption and rubbed grain;
- In the covering coats for soft leather to confer filling and softness whilst reducing stickiness;
- In the natural, greasy-touch finishing mixed with other suitable waxes.

Application

Despite its slightly cationic charge, RODA® Oil AA 4040 can be easily mixed with most of the products usually utilized for anionic finishing. In this case compatibility trials should be performed before its usage.

Chemical nature

Formulated by oils

Appearance

White opaque liquid

Solids

>49.0 %

pH

4.5 -7.5

Carica

Slightly cationic

Storage

The product can be stored in its original packaging between 5°C and 35°C for 12 months.
